Education

Carleton College, Northfield, MN

Bachelors of Arts, Computer Science; GPA: 3.74

June 2027

Relevant Coursework: Data Science, Software Design, Mobile Software Dev, Computer Systems, Data Structures, Algorithms

Study Abroad: Aquincum Institute of Technology Budapest

Skills

Computers: Python, Kotlin, AWS RDS, Java, JS/TS, HTML/CSS, SQL, C

Languages: English (native), Hindi (native), Spanish (intermediate)

Projects

Sean

- Designed and developed a music review and recommendation mobile application in a team of 3 with a Kotlin/Compose frontend and a Firebase backend, following the MVVM pattern for screens.
- Implemented API usage, UI state machine systems, intent handling and dependency injection.

Samudri - POS system (in progress)

2025

- Built a full-stack Inventory & Sales Management System with an HTML/CSS/JS frontend and Flask/SQLAlchemy backend connected to AWS RDS, streamlining shipment tracking and sales reporting
- Deployed the application on Vercel, enabling secure, scalable, and accessible web access for end users
- Developing payment integration to enable seamless transaction processing for both users and vendors using Stripe

NutriChaser - Nutrition Tracker

2024

- Developed a full-stack website using PostgreSQL, Flask, and HTML in a 4-person team, designing database schemas and implementing search functionality to provide users with USDA nutritional data
- Implemented comprehensive unit tests for all website pages, including HTML error response edge cases, improving UI reliability and minimizing user-facing errors
- Led front-end development using HTML, CSS, and JavaScript, implementing responsive layouts and interactive animations to optimize UI/UX

Workout Logger Web App

2024

- Developed a prototype workout logging web app in a 3-person team with a mentor, collaborating remotely over a 2-week sprint
 - Engineered the backend using Flask and SQLAlchemy, designing and implementing Workout and Exercise data models to structure and manage an existing dataset efficiently
 - Built a responsive HTML/CSS front-end, ensuring optimal layout and mobile-friendly functionality
-

Work Experience

Software Engineering Extern, Carleton College, Northfield, MN

December 2024

- Engineered database models in SQL and Flask ORM and implemented dynamic webpages in HTML/Flask for a workout logging web app
- Optimized backend data structures in SQLAlchemy and enhanced frontend usability in a 3-person development team

Resident Assistant, Carleton College, Northfield, MN

September 2024 - July 2025

- Designed weekly newsletters and organized community events, driving engagement and fostering a strong sense of community
- Managed community crises with the Security office, supporting residents facing mental health challenges to maintain safety and well-being

Software Intern, Nexivo Consulting, Hyderabad, India

July 2024 - August 2024

- Analysed and optimized CRM workflows by gathering and translating user needs into actionable user stories, laying the foundation for streamlined and high-impact software design
- Conceptualized a CRM platform for universities to streamline student applications and enable structured, two-way communication between students and colleges
